

# StrapCycle: X-Pak PET Recycling Program

## Sustainably Closing The Loop

More and more businesses are asking about recycling options for used PET strapping.

X-Pak makes it simple and practical - we handle the process end-to-end so you don't have to.

With X-Pak, recycling is as simple as: **Chop → Bag → Collect → Recycle**

## How It Works

### 1. Chop

PET strap is cut into chips using an X-Pak supplied/ arranged strap chopper.

### 2. Bag

The chopped material is stored in bulka bags — clean, sorted, and ready for pickup.

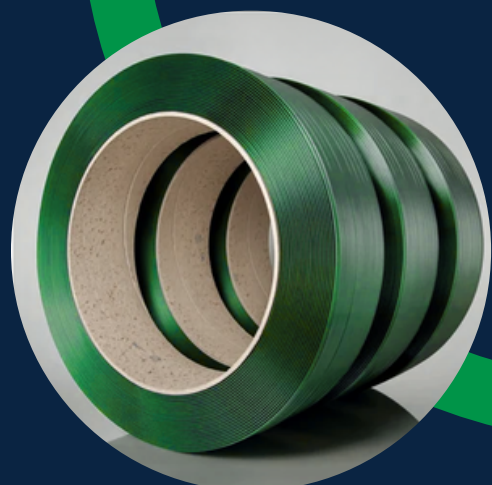

### 3. Collect

Once your bags are full, X-Pak coordinates collection and transport to the recycling facility.

### 4. Recycle

We partner with recycling organisations to process the PET, turning it into reusable resin for new products, including new PET strapping.

## Benefits for Your Operation

- **Sustainability Reporting** – contribute to ESG goals
- **Safe & Practical** – lighter & safer than steel
- **Simple Implementation** – chop, bag, we collect
- **Trusted Partner** – local, hands-on support
